

What is happening in the United States right now?

It is truly amazing that by using simple math and the same set of criteria for each planetary combination that we can now have “fixed” rules. So much so that we are building a software program around these rules that applies to all humankind. How is this possible if time produces events at random and no one can predict the future? It is not only possible to predict the future, but we are fools if we do not look and pay attention. These time frames can be documented years in advance and they work whether you are studying the past or the future.

The “Kerry Theory” shows how **Indirect Energy Chains** (IEC’s) will operate between February 25, 2010, and March 8, 2010, affecting all Americans.

February 25 through March 8, 2010 - Jupiter “negative” Uranus

This time frame is an indicator of a BIG mistake. This influence gives the determination to do something without advice, counsel, or evidence based on logic or planning. In other words, you jump right into the “thick of things”. This may be a really disastrous time because those in power have false confidence that they can succeed even with a lack of practical application or experience. This will bring about unexpected losses or changes to America in a big way.

Venus	Jupiter	S. Node	Uranus	Sun	Saturn	Mars	Neptune	Mercury	Pluto
2.84	5.88	6.59	8.91	13.12	14.80	21.23	22.42	24.29	27.55
Can	Can	Aqu	Gem	Can	Lib	Gem	Vir	Can	Cpr
Mars	Saturn	Pluto	Sun	Jupiter	Venus	S. Node	Mercury	Uranus	Neptune
1.32	3.08	5.00	7.27	9.14	18.13	20.19	23.98	25.48	26.58
Leo	Lib	Cpr	Pis	Pis	Pis	Can	Aqu	Pis	Aqu

The new computer programming rule pulls up the United States’ chart and gives us a reading of how government policies will affect the citizens of this country.

Rule 5b - If you have a Transit-Transit IEC and one of the transit bodies is square or opposite the other’s corresponding natal body, it tells us the direction that the transit-to-transit IEC will take.

Transiting Jupiter is “negative” to the United States natal Uranus telling us long in advance that a huge error in judgment is about to occur. Can we stop the process or must we continue to pay the heavy price?
